Technical Description

The Xtend+Climb® SuperPro Series 4.4m telescopic ladder represents our top of the line telescoping ladder, designed specifically for the most demanding professionals. We started with the 3.8m Pro Series telescoping ladder and then improved upon it with specific enhancements for professionals that require the best tools to do their jobs. Internal fittings including the couplings are made from aluminium and CNC machined to precisely fit, unlike our competitors who use plastic to keep down weight and costs.

The 4.4m SuperPro comes in a matt-black finish that not only looks amazing, but is both durable and easy to keep clean, even on the most punishing job sites. Like all of our extending ladders, it's easy to transport and carry. The ladder weighs 18.3kg, fully extends to 4.4m (14.5 feet) and closes to 92cm (38.5 inches). We designed the 4.4m Super Pro Series telescopic ladder to meet the needs of our most demanding contractors and professionals. It's truly an outstanding product, and not just a great telescoping ladder, but a true advancement in ladder technology.

Re-designed from the ground up, this Xtend+Climb now features the Lightning Latch and Locking Stabilising Bar making it easier to retract the ladder and add greater stability when working at height. This ladder fully complies with the new EN131-6 rules on stabilising bars and lowering the ladder into a stored position.

- » Fully extends to 4.4m (14.5ft) and compacts down to 92cm
- » New Lightning Latch for easier lowering into the storage position
- » New built-in wide stabilising bar locks in place before climbing
- » Features patented True Telescoping Technology
- » Aerospace Engineered using aircraft grade aluminium alloy for maximum strength
- » Double sided feet for durability and traction
- » Integrated padded carrying handle for easy carrying
- » Superior matt-black clean-touch Anodised finish keeps your hands oil free

Standards & Classification

- » Max Load 150kg
- » EN131-6

Warranty

- » 3 Year
