

Double Ended Work Platforms

Our double ended access platforms are ideal for safe and secure high level work. They have a generous platform to enable efficient working with steps at both ends of platform for ease of access. Heavy duty punched metal treads are used and for your safety 914mm high handrails are located either side of steps and over platform

6 tread and below models have hand lever to lock/unlock all four castors

Models with 7-10 treads have adjustable screw jacks for stability

Model Shown HBD006

Red Powder coat is standard with galvanised coating available upto 6 tread for improved corrosion protection (add G)

Code No.	No. of treads	Overall height mm	Platform height mm	Overall depth mm	Overall width mm
